

Begging for Chemtrails Yet?

by Chemtrails911.com

How will pro-chemtrails organizations get the to masses to beg to have the skies sprayed with chemical trials?

By the thousands of anti-aerosol and anti-Chemtrail websites public and private pro-chemtrails entities involved with aerosol operations know that the people are very opposed to the deliberate dumping of chemicals in our sky. For many years these public and private entities have tried to deny and cover up the existence of chemtrails to no avail. They have realized that more and more people are uncontrollably waking up to the existence of chemtrails and that there old method of denial and cover up is no longer working.

These public and private entities are now forced to change tactics. They are pulling out a tried and tested technique that has worked so successfully in the past to control public opinion, it is most simply called Crisis Reaction Solution. It is in age-old propaganda technique historically known as the "hegelian dialect" and it is in full motion at this time. Let us explain.

They, lets call them criminals disseminate the propaganda, present a crisis, it can be actually real or manufactured. The crisis in our case is global warming/climate change. They could have either created the crisis Global Warming (by unlimited use of ionosphere heaters, HAARP) or bring attention to a current problem, or decided to entirely make up the crisis Global Warming.

The Criminals hype the crisis (terrorism, illegal drugs) and pound it into all media outlets. They may present the Crisis, with a hypothetical date with pending doom. For example i.e. we here the mouthpieces say, "we are already seeing the devastating effects of global warming the big one could be anytime now". Or we hear them say 'we only have a year or two to take action we have so little time. The criminals present the crisis in a way that the people will think it is very bad and we must act now!

After constant media bombardment about the crisis presented in a way to instill fear in the people a predictable second stage unfolds; the Reaction Phase. The people have become fearful and scared, because they are reacting to the horrible news they have heard. So naturally the people demand action to taken. But they are unsure what action needs to be taken. So they turn to the people whom presented the crisis in the first place because they seem to know so much about the problem. As a result we now see concerned citizens asking pro-chemtrails groups like NASA, IPCC, and other Government Agencies what can be done to prevent or stop this crisis of Global Warming. The irony is that it is these pro-chemtrails groups, public and private that have been carrying out covert spray operations.

Once the people are scared and demanding that action be taken. The propaganda has worked just as planned. The criminals then present the final stage of their stunt; the Solution Phase. (This is what they have wanted all along but knew if they openly asked the people they would not approve.) So now in the Solution phase the Criminals present their Solution as the *only* possible solution to the crisis. We are evening hearing them say, 'Sky Soot will allow us to use fossil fuels freely. It's a quick solution' At this phase the criminals may present their desired solution next to an even more bazaar solution to make their desired solution seem to be the most reasonable course of action. We often hear the Criminals say "aerosol operations are more cost effective than sky mirrors which would cost billions and aerosols operations only millions."

The Criminals want to spray our skies and the people are reluctant to accept this concept so the only way the criminals can get the people to accept aerosol operations is to present it like there is no other alternative and we have a serious threat, a crisis. Once the people are fearful and sacred they will approve just about anything without question. Before too long people will start to accept this concept and it will no longer sound strange or bad when the criminal's desired solution is being falsely portrayed as the only alternative to death and destruction. The people will soon be asking for chemtrails because they have been manipulated in to believing chemtrails will save the planet and humanity.

Mission Accomplished. A successful propaganda campaign- again.

We are not debating if the global warming issue real, fabricated, inflated etc. We're not saying that the use of aerosols and chemtrails sole purpose is to modify the weather because we are well aware of dual use technology. We are simply trying to explain is how pro-chemtrails organizations are trying to manipulate public opinion to accept the spraying of our skies through the manipulation of facts based around climate change. We at chemtrails911.com have been reporting that the pro-chemtrail community has been using hegelian dialect for years to manipulate the masses around this issue. Their propaganda campaign is moving into the solution phase.

Is Chemtrails911.com Psychic?

No, we are not. We are simply informed on how governments have used the Hegelian Dialect on the people for thousands of years. There are many other past and present issues that we can apply this technique of crisis, reaction, and solution. For more examples of this technique and how it has been used in recent times please view Terror Storm by Alex Jones.

It is at this time, that we anti-chemtrails activists, must be more diligent at explaining to the masses and educating others how they are being manipulated into accepting aerosol operations as the only possible solution to climate change/global warming. These criminals are performing a mass pro-chemtrail propaganda campaign. Aerosol operations are not a solution to the problem. It is totally unacceptable to dump chemicals in to our skies. It is an irreversible action that cannot be tolerated for any reason. So at this time we must work harder than ever to educate and to spread the word of their tactics to manipulate the people into accepting their most horrific concept of spraying chemical into our precious sky.

We are on the front lines fighting a mass propaganda campaign. We finally brought this issue to the main stream by exposing their aerial spray operations to the point where they can no longer deny chemtrails. The fight for our skies in some ways has just begun.

Please copy and paste this analysis and post it on all bloggs, new alerts and articles whenever you see the pro-chemtrails mouth pieces at work.
